- Examination certificate PTZ 18 ATEX 0029 X

### Suitable for:

- Aerosols
  - Flammable liquids
- ... and many more!

## How it works:

### 1 Easy, controlled access

Each user has a unique access code or device.

### 2 Simple Withdrawal

By direct selection, touch screen search function or product bar code scan.

### 3 Automatic Transfer

Replenishment orders are sent automatically to RECA-UK, in real-time.

### 4 Picking/Delivery

An order will go to our warehouse.

### 5 Replenishment

Your order is delivered and your machines are re-stocked by your RECA representative.

### 6 Reporting

Real-time monitoring of every withdrawal allows for automatic data analysis

### 7 RECA Support

Staff training, professional support and regular software updates are all part of the package on offer.

### 8 Continuous Service

Your machine(s) will be regularly checked by your RECA representative to ensure its continued service.

## Hazardous Material Cabinet

The hazardous material cabinet is intended for the safe storage of flammable liquid or aerosols.

Goods withdrawal is registered by sensors to monitor usage and stock levels.

The re-ordering of the parts is sent automatically by RFID signal to RECA-UK, when the pre-agreed minimum level is reached.
